Transforming Government with Intelligent Data Services

Commvault Industry Brief: Government

Prioritizing data as a strategic asset

Government agencies elevate their services with the use of intelligent solutions to provide personalized and accessible experiences, protect citizen data, and deliver on the promise of a sustainable future. Reliable data that can be quickly located, accessed, and shared without risk of damage or loss is key to these initiatives' long-term success.

Digital transformation relies on data agility

As government agencies seek to create a future of economic, social, and environmental prosperity with the use of advanced, intelligent solutions,the digital journey can get bumpy. Too often data becomes siloed, fragmented, and even left unprotected across an increasingly complex environment. Commvault can help solve tough data challenges across all government sectors and provide the agility needed to:

Improve compliance and regulatory adherence with audit trails

Protect government data from ransomware and other cyber threats

Improve data availability to enhance customer experiences

Solve legacy data issues, including migrating to cloud-based applications

Reduce overall data costs with advanced, secure data archiving

Improve business continuity with cost-effective disaster recovery options

Accelerating data-driven innovation in government

Gain the agility needed within the modern data environment to realize digital transformation goals.

Public Sector

- Enable remote government access
- Modernize legacy applications
- Improve visibility into data
- Deliver trusted and secure services
- Enable a shared services model

Defense and Intelligence

- Improve mission readiness
- Enable rapid innovation
- Deliver secure and trusted services
- Improve command and control efficiencies

Simplify data protection and management

Commvault Intelligent Data Services help government agencies simplify data management across the entire data estate. AI-driven features and automation reduce compute, storage, and ongoing administrative costs while helping IT groups better protect and govern sensitive information access across all government sectors. As the data estate grows, Commvault solutions seamlessly scale to support interoperability and ensure data is secure, compliant, and always recoverable.

The agility Commvault enables is essential as government agencies take advantage of the cloud-scale predictive analytics, advanced AI, and workflow automation Microsoft Cloud for Government offers to modernize legacy processes and enable innovative services that foster a sustainable future.

Commvault Intelligent Data Services

A unified, future-proof platform spanning the full life-cycle of data management, Commvault delivers data management solutions that seamlessly integrate and protect data, from legacy to modern workloads, regardless of where data resides.

Data protection

Protect data at scale, unifying data management across hybrid/multi-cloud environments.

Data security

Boost your data resilience with advanced, multi-layered protection, and rapid recovery from security threats including ransomware and data breaches.

Data compliance and governance

Help ensure compliance with data access regulations and requests. Manage and remediate data risks, as part of a broader data governance strategy.

Data transformation

Seamlessly move and repurpose data across environments for cloud migration, application modernization, and increased data access and connectivity for business users.

Data insights

Use AI and ML-driven data insights to drive efficiency and cost savings across IT operations.

"We now have the ability to migrate virtual machines to the cloud. We can migrate virtual machines down to our on-premises environments. We can easily restore to our Azure environment, which is where we're moving currently."

- Jeff Day, Team Supervisor, State of Nevada

Better together: Commvault + Microsoft

Commvault and Microsoft co-engineer Intelligent Data Management solutions to meet customers' biggest data challenges and accelerate cloud adoption. Our 20+ year partnership offers specialized understanding of how to best architect solutions for Azure and integrate workloads to meet industry-specific requirements. Metallic® DPaaS, our SaaS-delivered portfolio of solutions built on Azure, is our latest innovation to help enterprises move faster and achieve more.

Why Commvault

11th consecutive year: 2022 Gartner Magic Quadrant™ Leader for Enterprise Backup and Recovery Solutions

Highest product scores: Gartner 2022 Critical Capabilities for Data Center Backup and Recovery
