

DON'T RE-SIGN, RESIGN VERITAS.

Before you renew your Veritas contract, think twice. Switching to Commvault means getting more comprehensive security for less than you're paying with Veritas. And on top of all that, it's never been easier to make the switch.

RE-SIGNING= MORE COST, TOOLS, & GAPS

Veritas requires six or more tools to come close to what Commvault does with one unified platform. That means less cost, fewer tools and zero security gaps.

STOP PAYING 43% MORE IN TCO

What's that smell? It's your money burning. But customers who ditched Veritas for Commvault saw an average of 43% savings in TCO.

ZERO LOCK-IN, ENDLESS POSSIBILITIES

Commvault doesn't restrict how you deploy and scale. Veritas on the other hand? You're stuck with what you've got.

5 MINS VS. 24 HRS THREAT DETECTION

While Veritas lacks active monitoring capabilities, Commvault leverages preventative tactics like honeypots to provide early warning signs and identify threats before they strike.

But, don't just take our word for it!

What do the world's largest software and soft drink companies have in common? Why us, of course. Watch this short video clip to hear how Coca-Cola got the 411 on Commvault.

Schedule a demo to hear why other companies have left Veritas for a more cohesive and comprehensive data security platform like Commvault.
